

SUMMER RESEARCH INSTITUTE

2017 FAU Residential Summer Institute through FAU Pine Jog Environmental Education Center

**July 31—Aug 4,
2017**

**Academic Social
Immersion (ASI)**

***Build Your College
Portfolio While
Having Fun!***

\$595 per student
(plus \$10 owl card fee and \$32.04
FAU transportation fee)

FAU Pine Jog partners with FAU Research Centers and offers cutting edge 3 credit dual enrollment/ undergraduate course for Summer 2017!

FAU Pine Jog Center has joined forces with **FAU Jupiter**, **FAU Harbor Branch** and **CES Riverwoods Field Laboratory** to offer a unique, week-long, residential research and field studies institute for 9-12 grade students. This program, called **H2O to Go CONNECTIONS**, introduces students to scientists who are working in the field of environmental research. Students work with scientists and educators to develop an understanding for the interconnectedness and complexity of South Florida water systems and the environmental issues facing them. Students are exposed to research tools engineered by FAU that are currently being tested as solutions to Florida's environmental challenges. This program is designed to give students a professional experience not easily obtained by the general population and will provide a competitive edge, particularly to students interested in life science, engineering, oceanography, and research. Most importantly, students are guaranteed to have fun. Recreational activities such as kayaking, hiking and swimming are integrated throughout the learning activities.

A full week of fun and learning at three of FAU's premiere research facilities
